

Muhammad Alwi Zard

Information Systems Graduate

alwizard659@gmail.com | 0822-4033-5051 | www.linkedin.com/in/alwizard <https://github.com/muhammadalwizard>
Bandung, Indonesia

Fresh graduate in Information Systems from Universitas Komputer Indonesia (UNIKOM), with a strong foundation in business process analysis, system development, and data mining. Experienced in translating business needs into functional technical solutions, and skilled in applying the System Development Life Cycle (SDLC) to build database-driven systems. Supported by additional hands-on experience in web development and visual content design. Detail-oriented, adaptable, and comfortable working in cross-functional teams.

EDUCATION

Bachelor's Degree in Information Systems, Universitas Komputer Indonesia (UNIKOM) 2023 – Present

- Relevant coursework: Data Mining, Web Programming, Object-Oriented Programming (OOP), Database Administration, Animation & Multimedia, Information Systems Management.

ACADEMIC PROJECTS

Data Mining — Decision Tree

- Business Problem: lending institutions often struggle to assess loan applicant risk consistently when relying on manual credit review, leading to slower and less reliable approval decisions.
- Performed data preprocessing and credit classification using Altair RapidMiner Studio.
- Applied a Decision Tree model to predict loan approval based on credit history, income, and marital status, and evaluated results using Accuracy, Precision, Recall, and Confusion Matrix.

Wedding Equipment Rental & Reservation System

- Business Problem: analyzed operational issues faced by three wedding equipment vendors, including manual stock recording and frequent double bookings.
- Designed a web-based reservation system following the System Development Life Cycle (SDLC) approach.
- Conducted user requirement analysis, designed the database (ERD) and transaction flow (flowchart), and developed the system using Node.js, Express.js, MySQL, HTML, CSS, and JavaScript.
- Performed Black-Box Testing to ensure the system met user requirements; successfully reduced stock data input errors by up to 30%.

Miracle Mates Sales & Inventory System

- Business Problem: manual sales and stock recording caused mismatched inventory data across customer, cashier, and warehouse operations.
- Designed a sales and inventory management system covering customer, cashier, and warehouse workflows.
- Developed transaction, payment, and stock management features to keep inventory data accurate and consistent.

3D Modeling & Blender Project

- Business Problem: project-ready visual assets were needed for design and promotional purposes without relying on stock imagery.
- Built 3D assets from concept to completion in Blender — including base modeling, shape refinement, and surface/material detailing.
- Applied lighting and basic rendering techniques to produce polished, presentation-ready visual assets, combining technical modeling skills with a creative design eye.

WORK EXPERIENCE

PT PLI — CSR Volunteer / Intern

Feb 2025 – Present

- Created digital designs and visual materials for CSR programs and corporate initiatives.
- Supported content development using design and digital editing tools.

Urtype Clothing Brand — Admin & Content Designer

Aug 2024 – Feb 2025

- Managed brand administration and created digital content, promotional materials, and visual assets.

- Developed creative content concepts using design software to improve social media reach and engagement.

Event Organizer Agency — Media Specialist

Aug 2024 – Feb 2025

- Developed digital content and media materials for events and promotional activities.
- Supported content production, digital publication, and social media management.

CERTIFICATE

- **Cisco Networking Academy — CCNA: Switching, Routing, and Wireless Essentials (SRWE), Certificate of Course Completion, August 2025**

TRAINING

- Cisco Networking Academy: Networking Basics — fundamental networking concepts, protocols, and configuration.
- Basic Node.js – MySkill: basic Node.js concepts and backend development fundamentals.
- Social Media Planning – MySkill: social media strategy, content planning, and audience engagement.
- AI-Powered Performance Ads – Google Skillshop: AI-driven advertising, campaign, and performance.

SKILLS

- Software: Microsoft Office, Canva, CapCut, Blender
- Tools: Altair RapidMiner Studio Blender
- Web Development: Node.js, Express.js, MySQL, HTML, CSS, JavaScript, REST API
- Business & Systems Analysis: translating business requirements into technical specifications; creating system documentation and user manuals; conducting testing and user acceptance testing (UAT); analyzing business processes and providing improvement recommendations
- Abilities: Social Media Management, Content Strategy, Content Writing, Team Work, Time Management
- Languages: Indonesian, English (TOEFL: 587)
